

The New Brevini Network: ideas to compete

Brevini Network is the new "Open Business Network" that joins Brevini Power Transmission, Brevini Fluid Power, BPE Electronics, V.P.S. Brevini, OT Oil Technology and IOTTI Hydraulic Cylinders. Its main goal is to share "value added" operating instruments to support both traditional and online sales.

BPE Electronics was founded in 1987.

Thanks to the entrepreneurial spirit of Angelo Becchi who has set up many research projects and experiments since the 1980's that mainly resulted in the production of electronic boards, control modules, levelling devices, planarity indicators, angle sensors, length sensors, angle and length sensors, pressure transducers, extensometer transducers and load cells, displays, solar tracking systems, amplifiers for extensometer transducers and power supply units, all for many applications in the mobile, lifting and machine management and safety sectors.

BPE know-how is the basis of systems and fully customizable solutions and hence highly competitive in sectors such as in the machine management, control and safety sectors.

Brevini Fluid Power was born in 2003 in Reggio Emilia,

created by the union of Aron, Hydr-App, SAM Hydraulik, Oleodinamica Reggiana, Brevini Hydraulics, to which were added V.P.S Brevini in 1998, BPE Electronics in 2008 and OT Oil Technology in 2009. Brevini Fluid Power is a global player in the hydraulic market and develops components and application packages for industrial equipments and mobile machines with a strict interaction between mechanics, hydraulics and electronics. Therefore provides a wide range of products, integrated systems and customized solutions, so as to meet the largest number of customer needs. The company reaches a consolidated turnover of about 120 million euro with 7 productive plants and 14 branches with more than 700 employees.

Brevini Power Transmission was founded in Reggio Emilia in 1960

by Renato, Luciano and Corrado Brevini and it is among the top 5 companies in the world in the field of planetary gear and power transmission thanks to the global presence in industrial applications (steel industry, material handling, shipyards) and in innovative applications such as wind turbines, waste recycling plants and energy generation. Brevini Power Transmission reaches a consolidated turnover of about 320 million euro and is controlled by the holding company Brevini Group. Its headquarters are in Reggio Emilia with 5 productive plant (3 in Italy, 1 in Germany, 1 in China) and 26 branches worldwide with a total of 1.700 employees.

V.P.S. Brevini was founded in 1994 and in 1998 was merged in Brevini Group.

With a capacity of 60.000 working sections, V.P.S. Brevini produces a wide range of modular and mono block directional control valves. All the production VPS Brevini wants to be a high quality production. Indeed the project of each single valve and the choice of the better materials, machined with the highest technologies and under the strongest controls in each process. The recent change of organization and structure (January 2014) makes V.P.S. more integrated inside Brevini Fluid Power world. The company becomes fully customer oriented and more flexible, therefore assures short lead time and customized products even in small quantities.

OT Oil Technology was founded in November 2001, and since 2010 is part of Brevini Fluid Power.

It manufactures a valid range of external gear pumps, gear motors and gear flow dividers and it is a modern, reactive and customer oriented company. The keys to the great success of the last few years have been: short lead time, respect of order confirmation, flexibility in manufacturing customized products and competitive price for "Made in Italy" products. Due to the high quality, reliability and advanced technology, OT is trusted by a lot of customers worldwide. OT R&D Department focuses on high quality and innovation. The company has a goal to exceed a sales volume of 120,000 units by the end of 2016; more than 70% of these sales will be addressed to the export market.

IOTTI Hydraulic Cylinders was founded in Reggio Emilia in 1963

by Giovanni Iotti and in 1982 the Company moved to its new headquarters: here the company started operating in the earth moving machine and forklift truck manufacturing sectors. A few years later it began to build large sized cylinders and improved its experience in handling heavy loads and waste-compacting presses. From the second half of the 90s the Company was mainly focussed on manufacturing small and medium series of large-sized cylinders to be used in various business fields. Currently its products are exported all over the world, and are appreciated for the high quality/price level.

Global Marketing Synergies

The advanced marketing activities in the new global market are a major field selection and cannot be renounced, given the development and reaction to the economic crisis.

Brevini Network can be a major competitive advantage. The first collaboration between Brevini Power Transmission, Brevini Fluid Power, BPE Electronics, OT Oil Technology, V.P.S. Brevini and IOTTI Hydraulic Cylinders, consist of advanced marketing activities with value added. By uniting the potential of large, medium and small businesses, the Network

gives everyone an opportunity to grow. The marketing team of Brevini Fluid Power is the "driving force" for the new network business.

Brevini Network follows and gives more strength to the Brevini Group direction of sharing synergies, by participating together to major fairs throughout the world, by opening several branches in common between the two Brevini companies, and building product and application systems with other companies that are part of the group.
